

Recommended Bushcraft Reading

The titles, authors and ISBN numbers below are related to books that we would recommend to those who want general information on plants, recipes, tree identification and mycology. Whilst they are not the only books on the market written about those subjects, we have found them invaluable in the past. We would also like to note that there is no substitute for being shown the trees, mushrooms etc in person. We wish you happy reading. Enjoy!

Foraging

Jon Stokes – Trees of Britain and Ireland – ISBN – 978-0-691-22416-9
